

Step by step instructions to access permit documents and submit comments:

go to <http://www.deq.state.mi.us/owis/Page/main/Home.aspx>

Click on Permits on Public notice

Click drop box at top, Permitting Program

Click NPDES

Click search bottom right side

Click #4 at the bottom left

Click on Dow in front of the permit number

Open each document at the bottom of page and save.(There is 1,2 at the bottom with more documents on page 2)

Documents related to the facility are available in PDF format. To open any of the available documents, please click on the icon to the left of the document name. The draft permit and public notice document are available for each facility. A fact sheet is available for facilities which discharge over 500,000 gallons per day, and facilities classified as " major " by the Environmental Protection Agency. An antidegradation demonstration is available for facilities which propose a new or increased discharge as required by Rule 323.1098.

Comments or objections to the draft permit received by the response date, indicated on the public notice, will be considered in the final decision to issue the permit. Persons desiring information regarding the draft permit, and procedures for commenting, or requesting a hearing should contact the permit processor.

Electronic comments may be submitted to the permit processor by clicking on the permit processor's name. Written comments should be mailed to: Permits Section, Water Bureau, Department of Environmental Quality, P.O. Box 30273, Lansing, Michigan 48909.
